

| Features |  |
| :--- | :--- |
|  |  |
| Standby Current | 35 mA |
| Alarm Current | 65 mA |
| Ambient Operating Temp | $0^{\circ} \mathrm{C}-49^{\circ} \mathrm{C}\left(32^{\circ} \mathrm{F}-120^{\circ} \mathrm{F}\right)$ |
| Maximum Wire Length | $4000^{\circ}$ |
| Maximum Annunciators | 31 |
| Size (H x W x D) | $5-7 / 8 " \mathrm{x} 7 \mathrm{7} \mathrm{C} \times 1-1 / 2^{\prime \prime}$ |
| Wire Gauge | $14 \mathrm{AWG}-22 \mathrm{AWG}$ |
| Compatible Control Panels | PFC- $8060 \&$ PFC-8500 |

Product includes a 5 year warranty

## Description

The LCD-AN is a LCD remote annunciator for the PFC-8060 and PFC-8500 addressable fire control panel. The LCD-AN communicates using a RS-485 connection to the main panel providing common indication of Alarms, Supervisory, Trouble and other system status and control functions. The LCD-AN features a 20x4 LCD display with LED's for Power, Alarm, Supervisory, Trouble, and Silenced conditions. It can be mounted on a 2-gang electrical box or a standard 4 " sqaure electrical box. The keypad is only operable when a keylocked security switch is set to the enable position.

## Installation

The LCD-AN is connected to the PFC-8500 using a four wire RS-485 connection. The connection is power limited and supervised. Up to thirty-one (31) remote annunciators can be connected using Class B (Style 4) wiring.

## Configuration Characteristics

- The RS-485 maimum wire length is 4000 feet ( 1219.2 meters)
- Maximum wiring resistance is less than 40 ohms
- Maximum capacitance between wiring is less than 0.4 micro $F$

## Notes

1. JP of the farthest annunciator must be shorted, and JP of other annunciators shall be open
2. Any connection to ground of 10,000 ohms will be annunciates a ground fault
3. Remote annunciators must be mounted on either a 2-gang or standard 4-inch square electrical box

## LCD-AN Class B Wiring Example

[^0]
## Address Settings

1) Switch 1 of Dip Switch S1 set on, after that input 24 VDC to TB1.

2) The LCD-AN shows LCD display as follows. Set the assigned number by $0-9$ key. After that, pust ENT key.
3) Swtich 1 of Dip Switch S1 set off, LCD-AN will proceed to initializing.
