**Product Description**

The PAM-4 Relay is an encapsulated polarized device providing 10.0 Amp form C contacts. The relay may be energized by an input voltage of 9V DC to 40V DC. The input has a built-in polarizing diode.

The PAM-4 may be mounted by using the double-sided adhesive tape, the self-drilling screw, or loosely placed in an electrical box.

These devices are ideal for applications where remote relays are required for control or status feedback. They are suitable for use with HVAC, temperature control, fire alarm, security, energy management, and lighting control systems.
