Auto-Test Pressure Switch

The Auto-Test Pressure Switch (ATPS) incorporates the functionality and replaces both the traditional waterflow alarm pressure switch and low / high air supervisory switch, for dry and preaction sprinkler systems, while automating required waterflow alarm and air supervisory pressure testing.

Fully Automates Testing /

- Waterflow Alarm Pressure Switch
- Low and High Air Supervisory Pressure Switch
- UL Listed, FM Approved
- NFPA 25 compliant

Safer and More Reliable Tests /

- Eliminates accidental system trips
- Accurate digital pressure measurements
- Eliminates system pressure losses during low supervisory pressure testing, preserving nitrogen and eliminating re-purging after tests
- Reduces stresses associated with lowering and then over pressurizing the sprinkler system

Versatile Installation /

- Replaces both pressure switches on dry and pre-action systems
- Riser or wall mountable
- Flexible hose connections for ease of installation

Ordering Information:

Model	Description	Part #
ATPS	Auto-Test Pressure Switch	1341500
ATC-1	Single Zone Test Control	1000221
ATC-4	Four Zone Test Control	1000224
